v.

**RULING**

It was brought to the Court's attention at the end of the oral arguments during the myriad motions for summary judgment that the Court had not ruled on Counsel Spurlock's October 25, 2016 "Application for Attorneys' Fees and Costs Incurred in Motion to Strike Estimators' Opinions."

Although the Court has declined to award attorneys' fees during the dispositive motion practice process are there are simply too many motions to determine how to appropriate and fairly apportion the potential award of attorney fees and costs. Thus the Court will defer ruling on those issues until the matter is resolved.

However, in reviewing the Court's orders in the fall of 2016 and with a desire to remain consistent with those rulings, the Court will grant the Application for Attorneys' Fees and Costs in the amount of **\$1907.50**. Counsel for the Farrell defendants shall lodge a propose form of judgment for the court's signature within **10 days** of the date of this minute entry.
